

Project Design Phase-II Data Flow Diagram & User Stories

Date	31 January 2025
Team ID	
Project Name	Visualizing Housing Market Analysis:An Analysis of Sale Prices and Features using Tableau
Maximum Marks	4 Marks

Data Flow Diagrams:

The Data Flow Diagram (DFD) represents the flow of housing data within the system.

Housing datasets containing sale prices and property features are collected from data sources.

The data is cleaned, transformed, and prepared for analysis.

Tableau processes the data to generate charts, graphs, and interactive dashboards.

Users interact with the dashboard using filters and visualization tools.

The final output provides meaningful insights into housing market trends and sale price patterns.

Example: (Simplified)

1. User uploads the housing dataset (CSV/Excel).
2. Tableau processes and cleans the data.
3. Data is analyzed and visualized.
4. Insights and trends are generated.
5. Results are presented to users through interactive dashboards.

Example: DFD Level 0 (Industry Standard)

User Stories

Use the below template to list all the user stories for the product.

User type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
User (Home Buyer/ Investor)	Data Upload	USN 1	As a user,I can upload housing datasets in CSV or Excel format.	Dataset is successfully uploaded and displayed in Tableau.	High	Sprint-1
User (Home Buyer/ Investor)	Data Preprocessing	USN 2	As a user, I can view cleaned and transformed housing data.	Missing values and incorrect data are handled properly.	High	Sprint-1
User (Home Buyer/ Investor)	Sale Price Analysis	USN 3	As a user, I can analyze the distribution of house sale prices.	Sale price charts and summaries are generated successfully.	High	Sprint-1
User (Home Buyer/ Investor)	Feature Analysis	USN 4	As a user, I can compare property features such as area, bedrooms, and location with sale prices.	Interactive visualizations are displayed correctly.	High	Sprint-1
User (Home Buyer/ Investor)	Interactive Dashboard	USN 5	As a user, I can interact with dashboards using filters and parameters.	Users can apply filters and view updated insights instantly.	High	Sprint-2
User (Home Buyer/ Investor)	Trend Analysis	USN 6	As a user, I can identify housing market trends and patterns.	Market trends are visualized through charts and graphs.	Medium	Sprint-2
Real Estate Analyst	Correlation Analysis	USN 7	As an analyst, I can view correlations between housing features and sale prices.	Correlation heatmaps and analytical reports are generated.	Medium	Sprint-2
Administrator	Dashboard Management	USN 8	As an administrator, I can manage and update dashboards and datasets.	Dashboards and datasets can be modified successfully.	Low	Sprint-3
Administrator	Report Generation	USN 9	As an administrator, I can generate reports from housing market analysis.	Reports are exported successfully in required formats.	Medium	Sprint-3
