

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	31 January 2025
Team ID	
Project Name	Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Data Collection	Import housing dataset from CSV files, Excel files, and external data sources.
FR-2	Data Preprocessing	Preprocessing Data cleaning, handling missing values, removing duplicates, and data transformation.
FR-3	Housing Price Analysis	Analyze sale price distribution, identify price trends, and compare property prices.
FR-4	Feature Analysis	Analyze the impact of location, area, number of bedrooms, bathrooms, and other property features on sale prices.
FR-5	Data Visualization	Create bar charts, line charts, scatter plots, heatmaps, and geographical maps in Tableau.
FR-6	Interactive Dashboard	Provide filters, parameters, and dynamic visualizations for user interaction.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The Tableau dashboard should provide a simple, interactive, and user-friendly interface for exploring housing market trends and sale price data.
NFR-2	Security	Housing datasets and analytical reports should be securely stored and accessed only by authorized users.
NFR-3	Reliability	The system should generate accurate visualizations and consistently provide correct analytical insights from the housing data.
NFR-4	Performance	The dashboard should load visualizations quickly and process large housing datasets efficiently with minimal response time.
NFR-5	Availability	The Tableau dashboard and reports should be accessible whenever users need to analyze housing market information.
NFR-6	Scalability	The system should be capable of handling increasing volumes of housing data and additional analytical features in the future.
