

Project Design Phase

Solution Architecture

Date	15 February 2025
Team ID	
Project Name	Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau
Maximum Marks	4 Marks

Solution Architecture:

The solution architecture consists of housing data collection, data preprocessing, analysis, and interactive visualization using Tableau.

Housing datasets are cleaned and transformed before being analyzed for trends and feature relationships.

Tableau dashboards provide charts, maps, and filters for user interaction and exploration of market insights.

The system generates meaningful visual reports that support data-driven real estate decision-making.
